

# SaferPayments

A greater peace of mind

The PCI Security Standards Council (PCI SSC) is an independent council in the payments industry requiring companies that process, store, or transmit credit card information to keep transactions secure and protect against card data breaches.

As a business processing card payments, a mandatory part of your data security is that you report your PCI compliance.

If you do not comply then you risk significant fines and penalties.

To be compliant with both the PCI-SSC data security standards and card brand rules and regulations, you need to perform validation on an annual basis to meet certain data security standards to protect the card data of your customers and to reduce the risk of a data security breach.

To strengthen your protection, Safer Payments provides payment protection to help secure your payments and support your compliance.

**SaferPayments offers you a streamlined, self-service PCI compliance tool to help simplify the PCI DSS validation process.**

Merchants that are using our point-to-point encryption benefit from PCI scope reduction and get a simpler SAQ within SaferPayments.

SaferPayments saves time and resources by taking on the complex responsibilities of fraud protection, and compliance against new and evolving threats to your customers while delivering greater peace of mind.

We're here to help and support you.

## SaferPayments Program

The SaferPayments program has been designed to help you to confirm your compliance by providing a web portal with tools for:

- Guiding you through a business profile and self-assessment questionnaire to complete annual attestation
- Providing you with the scanning tools to complete network and website scans
- Giving you the opportunity to upload your current compliance certificate if you have one
- Providing breach assistance in the event of a data breach
- Notifying you via email when your annual attestation and quarterly scans are due

**SaferPayments offers you a streamlined, self-service PCI compliance tool to help simplify the PCI DSS validation process.**
